

# **Supervisor meeting**

Wednesday, 30th of November 2016

## **Comments abouts the Control Chapter**

- Spacing in math is a minor thing. It is out decision to change it.
- B matrix (5.6) -> Maybe a bit more clear on how it goes into the matrix
- Top of page 38 -> Why are the poles there? - Clarify
- Clarify a bit where the bumps in figure 5.8

## **Tests**

- We could have Anders flying the drone and try to control one axis at a time.

## **Exam Date**

- The exam date is the 18th of January but we will like to move it.

## **Miscellaneous**

- Look into the time limitations of what the drone can actually do.

## **Next Supervisor Meeting**

Wednesday, 14th of December at 10:00
